Overview

By default you are a guest user when you enter Reverb. On the main search form you have the option of either creating a new account or logging on to an existing Reverb account. The vast majority of the data in Reverb is available to both guest and registered users. However, some registered users may have access to restricted data that can not be searched or ordered by guest users. The data provider will add your Reverb account to their **ACL** (access control list) if you need access to restricted data. Guest users are given a temporary session which is cleaned up after several hours of inactivity. If you would like for your queries, search results and shopping cart to be saved between sessions, then become a registered user by creating an [Earthdata Login](#) and logging in.

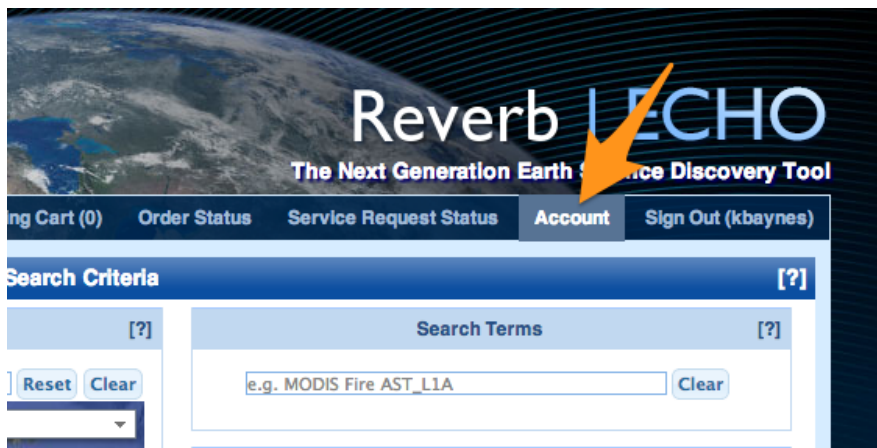

Creating/Updating Your Account

Creating a New Account

You can create an Earthdata Login at the following link: <https://reverb.echo.nasa.gov/reverb/users/new>

Updating an Existing Account

Once you have logged in, you can edit your Earthdata Login by clicking the "Account" menu item from the Reverb menu (as shown below). Note: you must be logged in to Reverb to make this change.

Logging In

1. Start by clicking the "Sign In" link from the top menu.

2. Enter your Earthdata Login username and password. Click "Go"

Sign In to Reverb
